

SEN3301 Semester-Long Project

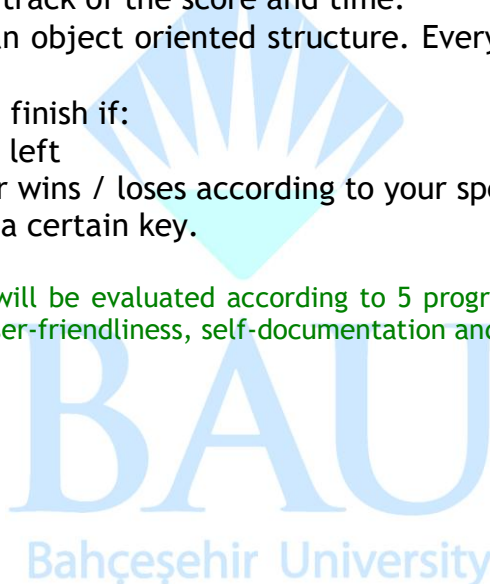

Deadline: May 31st, 2026. 23:59 (Please check the other deadlines from the table below)
(Strict, no extensions, through itslearning, **NOT** by email / messaging)

3D GAME - ALL UP TO YOU

You are asked to design a 3D GAME. The minimum requirements are as follows:

- The game should be in 3D.
- The size should be full screen, and adaptable to every computer.
- The background should be black or should have a mapped image.
- You should have at least 3 characters, moving randomly.
- Your game character should be controlled by mouse and / or keyboard.
- You should include mouse rotation and zooming controls in your program so that I can check the output from different angles, a.k.a. camera kontrol.
- You should include texture mapping to a number of shapes.
 - There should at least be a cylinder or a cone with a mapped image.
- You should keep track of the score and time.
- You should use an object oriented structure. Everything shouldn't be in the same class.
- The game should finish if:
 - No time is left
 - The player wins / loses according to your specifications.
 - You press a certain key.

Remember, your program will be evaluated according to 5 programming guidelines which are functionality, efficiency, user-friendliness, self-documentation and elegancy.

Important Dates:

Upload No	Due Date	Week	What to upload
Upload #1	April 5 th	End of week 5	1 st screen design with just the size and background. Teams should be formed on this upload.
Upload #2	May 3 rd	End of week 9	2 nd screen design, characters added to the screen. No user interaction is needed, but they should be animating. Also, document the rules of the game.
Upload #3	May 31 st	End of week 13	Finished project and documentation.
Presentations		Weeks 14 & 15 / During class hours	Team presentation wrt the announced presentation lists.

You can gather up teams up to **2** students at most. Please remember that **every** member of the team is responsible from the project. When a question is asked, every team member should be able to answer.
